

COLORFUL QUILLS

Sonic, our albino hedgehog, has been startled by a group of very noisy students and they've managed to color some of his quills! Use your multiplication skills to write the equations and solve these math questions:

1. Sonic has the same number of green and black quills. How many quills together?
2. Sonic has as the same number of purple, blue and red quills. How many quills together?
3. Sonic has the same number of black and green quills and the same number of blue and purple quills. Without seeing all his orange quills, can you determine if Sonic have more or less than 20 colored quills? Write this mathematical statement.
